

What is a Vacant/Void Property Inspection?

This is where a building or premises are unoccupied and the owner/factor needs someone to keep a check and ensure it won't fall into disrepair. of repair. Our personnel will attend the property in question and carry out the inspection, which would and/or may include but not be limited to:-

- External inspection
- Internal Inspection
- Meter reading
- Fire Alarm tests

We will also carry out additional duties such as take pictures of any damage and confirm meter readings. We can also act as a Key-Holder to your premises and allow engineers, estate agents access to the premises and show potential buyers around the property. We find that this service is extremely beneficial to our clients as they do not need to allocate additional resources to cover these requirements.
